

# SAP upgradation

## and AWS migration for consumer electronic company

### Client profile:

Based Japan	Industry: Entertainment	No. of Employees: 30000
Headquarters: Japan	No. of Locations: 100+ countries	Customer locations: Global

### The challenge

Our client wanted to migrate to the cloud to improve its ROI but was facing multiple technical challenges. **They were:**

- Struggling with 20+ systems including R/3 4.6c, supplier relationship management (SRM) 4.0, customer relationship management (CRM) 4.0
- Dealing with code page restrictions
- Facing infrastructure scalability issues with changing business needs. They were grappling with physical servers that presented volume extension challenges.
- Functioning without mandatory source database upgrades

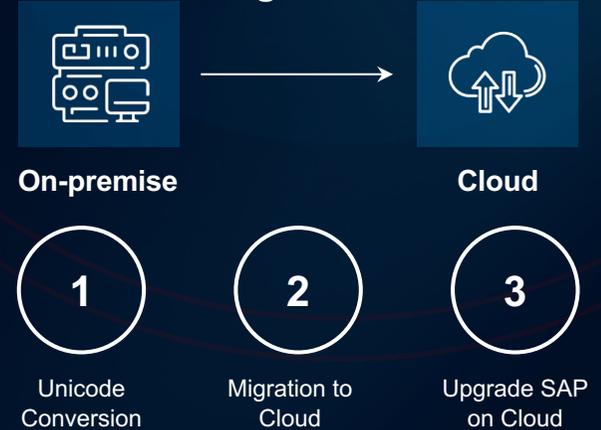

### The solution

**Bosch evaluated the client's IT environment to:**

- Recommend optimal cloud sizing for EC2 instances
- Advocate electronic bank statement (EBS) storage functionalities for scaling
- Implement Unicode conversion, migration and upgrade in big bang to AWS
- Minimize downtime methodologies
- Promote effective Cost Explorer usage for application lifecycle management (ALM) after the 'Go Live' stage

## SAP Systems Cloud Migration

### Business Outcomes

Through the successful implementation of Bosch's recommended strategies, the client experienced the following advantages:

**40%** faster migration execution with homegrown accelerators

Up to **30%** reduction of IT overhead in solution migration

Realization of hybrid landscapes

Accelerated innovations
